P. C. HUNTER, Agt.

Yes; stranger, just walk right into Echo any time of the day or night and you will find us ready to show the goods. Fertile land, abundant water, climate, markets. We are there every time.

The potatoes produced around Echo and Stanfield are said to give a larger yield and to be of better quality than the potatoes of the Yakima valley.

There is never a crop failure in an irrigated district. Sand, water and plentiful sunshine work wonders in the prolific production of the soil.

Echo has land enough around it subject to irrigation to make a city of 10,000. Its property owners and citizens can by continuing the progressive policy and pulling together make it reach that figure in a few years more. We must not let any chances pass us by, nor should we encourage lot speculators raising crops of tin cans and cast off rubbish.

Even as the sleepy toiler cares not which hole the dog crawls under the house—any hole will be all right so he quits barking at the moon—so the average citizen is anxious only that Congress adjourn and quit talking tariff.

It has been a hot time in Congress; but so it has been in the harvest field.

Men who have known conditions in Umatilla county for twenty years or more are the ones who are coming from Portland and Seattle to invest in irrigation and transportation projects. They know what is what.

There are advantages in a direct tax rate on property for a town instead of liquor licenses. There are in most towns more lots held for speculation than there are used for building and

residence. A direct tax induces these lot owners to make some use of their property, whereas a town supported by licenses on liquor rewards the empty lot owner for doing nothing, building streets and putting in public improvement of all kinds that enhance the value of every inch of real estate. There is much to be said on both sides, but the town with a direct tax on property instead of liquor licenses is not so bad off as some would have us believe.

Some people want a double cinched bargain that will net seven hundred per cent a week as an idle speculation in every real estate proposition their tight wad is placed on. Anything half way up to their expectations was and is gobbled by local investors. Naturally such visitors pass on down the line. Some of them have been passing down the line all their lives. Business lots in Portland at \$10 each were passed up by them in 1870.

Men looking for homes must expect that on new land and irrigation projects there will be some difficulties and privations. Echo has many opportunities all around, but the man expecting to lie in a hammock and draw a salary for buying a ten-acre tract on time should move to Washington City and be a United States Senator.

The more irrigation the nearer it will be to surface water. Cheap irrigation plants to supplement canal irrigation can be constructed so as to furnish water for the house and garden during the latter summer months when rivers and canals go dry.

Intense Colicky Pains Relieved
"For some years I suffered from intense colicky pains which would come on at times and from which could find no relief," says E. S. Mason of Beaver Dam, Ky. "Chamberlain's Colic, Cholera and Diarrhoea Remedy was recommended to me by a friend. After taking a few doses of the remedy I was entirely relieved. That was four years ago and there has been no return of the symptoms since that time. This remedy is for sale by Dorn & Dorn druggists."

For Sale—A good work mare weighing about 1200 pounds; seven years old. Fish & Toft, Echo, Oregon.

Do You KNOW

THAT we are selling as good lands for \$175 per acre as can be bought for \$500 in the Walla Walla valley. That we have just as good climate, just as good water supply, just as good people and have more room for more of them. That a man can get land enough here to make a good home and have all the comforts of life for less money than any other place in the Columbia basin.

If you are looking for bargains this is the place and now is the time. Take nobody's word, see for yourself, give us a chance to prove it. Raw lands that don't blow for \$100 an acre; the same lands in alfalfa at \$175; garden land, no better on earth, for \$175 per acre that you can raise anything on that is possible to raise in Oregon. Beaver dam land that will grow onions or spuds so large that the culls are prize winners, fruit in quantity and quality unsurpassed anywhere, and land that you can do this on for less than half you have to pay for land not half so good. This land is sub-irrigated and also has the best water right on the Umatilla river. Call on or address,
